Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

All references submitted in the information disclosure statement have been considered by the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to

whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 29 recites the broad recitation "another device", and the claim also recites "a motherboard" which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Giboney et al (US 6,318,909 B1).

Giboney et al reference discloses an optoelectronic device with all the limitations set forth in the claims, including: a first printed-circuit element, on which is mounted an optical emitter/ receiver ("32" Fig. 1A); having openings to receive centering pins of complementary optical connector ("43" Fig. 1A); the optoelectronic device being provided further with a heatsink, wherein the first printed-circuit element is applied

Art Unit: 2874

against a first face of the heatsink ("30" Fig. 1A and claim 2); wherein a flexible printed-circuit segment connects a first element ("26") to a second printed circuit element ("27"), the second printed circuit element being applied against a second face of the heatsink (Fig. 1A); the first face is a secant relative to the second face, and the flexible printed-circuit segment forms a 90 degree elbow (Fig. 1A); the mechanical support/ heatsink having two receptacles for receiving centering pins (Figs. 1D-1E); wherein the optic receiver is positioned between the holes (Fig. 1A); the second printed-circuit element has microbeads for connection with another device such as a motherboard (Fig. 3A);

Regarding claims 16 and 25, although first and second printed circuit elements are made rigid by being attached to the mechanical support/ heatsink (Fig. 1A).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knapp et al (US 5,768,456) disclose an optoelectronic package.
